

# Case Study: Network Engineering—GIG-BE and DISN

## DEFENSE INFORMATION SYSTEMS AGENCY (DISA)

### CLIENT NEED

DISA needed a trusted partner to evolve the DISN from a low bandwidth fragmented set of networks, into a single fully integrated, scalable converged network

### SOLUTION

- ▶ 1990: Network engineering support to the DISN
- ▶ 2001: DGS awarded, Apttis became a founding member of the GIG-BE
- ▶ 2003 - present: High-end network engineering support to optimize and converge the DISN Core

### RESULTS

- ▶ During this 18-year partnership, Apttis has helped transform the DISN to a state-of-the-art net-centric infrastructure and continues to drive the realization of the GIG
